

AMAN KUMAR

AI ENGINEER & FULL-STACK DEVELOPER

Bengaluru, India | +91 76671 16926 | amankumr3254u@gmail.com

[Portfolio](#) | [GitHub / ReaperXD67](#) | [LinkedIn / Aman Kumar](#)

SUMMARY

AI engineer building large language model (LLM) applications and full-stack products. Experience at SIP Organization and micro1 spans AI product delivery, backend integrations and self-adaptive systems.

EXPERIENCE

Project Lead Developer Intern

Jul 2026 - Present

SIP Organization | Remote

- Lead development of AI-powered WhatsApp onboarding and customer-assistance workflows, including context-aware conversations and response orchestration.
- Build backend integrations across AI microservices, coordinating reliability and end-to-end product delivery.

AI Engineer Intern

Aug 2025 - Jul 2026

micro1 | Remote

- Implemented automatic worker spawning and dynamic task allocation in a self-adaptive AI architecture.
- Built modular cells for inter-cell communication, workload distribution, resource management and monitoring.

Independent AI / Machine Learning Developer

2025 - Present

Freelance | Remote

- Deliver AI and automation workflows with PyTorch, FastAPI, Dify and n8n across training, evaluation, inference and data-processing pipelines.

PROJECTS

Autonomous Personal Agent | Durable Agent Control Plane

2026

Python, FastAPI, PostgreSQL, Redis, Docker | Local alpha | [Source](#)

- Built a durable agent runtime with a PostgreSQL transactional outbox, Redis dispatch, worker leases and bounded retries to recover interrupted tasks.
- Bound human-in-the-loop approvals to exact action payloads; checked persisted receipts to prevent replay of recorded side effects and rejected stale worker completions.
- Integrated local Qwen inference with controlled hosted-model fallback; isolated Docker workers and added dependency, secret and container-image scans to CI.

AtlasLM | Evidence-Grounded RAG Workbench

2026

Next.js, TypeScript, Qdrant, Upstash Vector, OpenRouter | [Live](#) | [Source](#)

- Built a live document workbench with deterministic PDF ingestion, contextual chunking, deduplication and source metadata preserved through retrieval.
- Implemented hybrid search with dense embeddings, BM25, reciprocal rank fusion, reranking and MMR; added evidence-sufficiency gates and citation audits.
- Deployed on Vercel with Upstash Vector and a local Qdrant adapter; exposed retrieval evaluations, timed traces and document-scoped semantic caching.

MinePulse / KarixMC | Minecraft Marketplace + Paper Plugin

2026

Next.js, TypeScript, Java, PostgreSQL, Redis, Prisma, Nginx | [Live](#) | [Source](#)

- Built and deployed a Next.js marketplace and Java Paper plugin for account linking, server-verified playtime rewards and in-game purchase delivery.
- Designed transactional ledgers, expiring delivery claims and durable plugin receipts; implemented refunds for eligible expired purchases with an auditable trail.
- Secured the plugin boundary with HMAC-SHA256 and replay protection; deployed app replicas, PostgreSQL and Redis behind Nginx with encrypted backups.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL

AI / ML: Retrieval-augmented generation (RAG), agentic systems, PyTorch, embeddings, reranking, evaluation

Backend / Data: FastAPI, Next.js, React, REST APIs, PostgreSQL, pgvector, Redis, Qdrant, Prisma, OAuth

Infrastructure: Docker, Linux, Nginx, GitHub Actions, CI/CD, Vercel, VPS, observability, webhooks

EDUCATION & CERTIFICATION

B.Sc. Computer Science

Aug 2024 - Sep 2028

Scaler School of Technology in collaboration with BITS Pilani | Bengaluru, India

Certified Freelance AI / Machine Learning Developer - micro1, Mar 2026 | [Certificate](#)
