

AMAN KUMAR

AI ENGINEER & FULL-STACK DEVELOPER

Bengaluru, India | +91 76671 16926 | amankumr3254u@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

AI and full-stack engineer focused on turning ambitious AI ideas into reliable products. Hands-on across model behavior, evidence-grounded retrieval, backend APIs, databases, integrations, deployment, and the user-facing systems people ultimately have to trust.

EXPERIENCE

Project Lead Developer Intern

Jul 2026 - Present

SIP Organization | Remote

- Lead AI-powered WhatsApp customer-engagement products, including context-aware onboarding and support workflows.
- Build backend integrations and scalable AI services across distributed microservices while coordinating end-to-end delivery.
- Improve production reliability, performance, and user experience for LLM-powered capabilities.

AI Engineer Intern

Aug 2025 - Jul 2026

micro1 | Remote

- Contributed automatic worker spawning and dynamic task allocation to a biologically inspired self-adaptive AI architecture.
- Designed modular cell-based components for worker creation, inter-cell communication, workload distribution, and scalable execution.
- Added resource management and performance monitoring for changing computational demand.

Independent AI / Machine Learning Developer

2025 - Present

Freelance | Remote

- Deliver LLM, machine-learning, backend, and automation workflows using PyTorch, FastAPI, PostgreSQL, Docker, Dify, n8n, and REST integrations.
- Build version-controlled model-training, evaluation, inference, and data-processing pipelines prepared for deployment.

SELECTED ENGINEERING SYSTEMS

AtlasLM - Evidence-Grounded RAG Workbench

2026

Next.js, TypeScript, Qdrant, Upstash | [Live](#) | [Source](#)

- Engineered deterministic ingestion plus hybrid dense ANN and BM25 retrieval with RRF, reranking, MMR, confidence scoring, abstention, and citation audits.
- Deployed a production-oriented interface with semantic caching, live evaluations, per-stage tracing, Qdrant TurboQuant, and serverless Upstash Vector.

MinePulse / KarixMC - VPS Marketplace and Game Integration

2026

Next.js, TypeScript, Java, Paper API, Prisma | [Live](#) | [Source](#)

- Shipped a VPS-hosted marketplace connected to a Paper 1.21.4 plugin for account linking, verified playtime rewards, stores, balances, and command delivery.
- Hardened plugin APIs with HMAC-SHA256 signing, replay protection, anti-AFK telemetry, privacy-preserving IP hashing, retries, and automated refunds.

Custom LLM - 125M Parameter Transformer from First Principles

2025

Python, PyTorch, Transformers | [Source](#)

- Trained a GPT-style model with RoPE, SwiGLU, RMSNorm, QK-Norm, untied embeddings, logit softcapping, Muon for matrix parameters, and AdamW for embeddings.
- Engineered a memory-mapped data pipeline and dual-mode workflow for rapid local debugging and large-scale GPU training.

TECHNICAL SKILLS

AI / ML: LLMs, RAG, PyTorch, Transformers, LangChain, embeddings, NLP, prompt engineering, model evaluation

Backend / Data: Python, TypeScript, FastAPI, Next.js, Java, Spring Boot, PostgreSQL, Qdrant, FAISS, BM25, Prisma, Alembic

Platform / Automation: Docker, GitHub Actions, Linux, Vercel, VPS, GCP, OAuth, webhooks, YouTube Data API, n8n, Dify

EDUCATION & CREDENTIAL

B.Sc. Computer Science

Aug 2024 - Sep 2028

Scaler School of Technology with BITS Pilani | Bengaluru

Certified Freelance AI / Machine Learning Developer - micro1, Mar 2026 | [Verify credential](#)
