

AMAN KUMAR

AI ENGINEER + FULL-STACK DEVELOPER

Not artificial intelligence. Accountable intelligence.

I build the engineering after the demo: model behavior, evidence, APIs, databases, integrations, deployment, operations, and interfaces people can trust.

SELECTED PROOF BUS

125M	TRANSFORMER	Built from first principles
HYBRID	RETRIEVAL	Dense + sparse + rerank
SIGNED	VPS BOUNDARY	HMAC + replay protection
CONTROLLED	AGENT SYSTEM	Policy + approval + audit

OPERATING CONTEXT

2025	AUG 2025	JUL 2026
Independent AI / ML Developer	AI Engineer Intern - micro1	Project Lead Developer Intern - SIP

SYSTEMS / EXPERIENCE / EVIDENCE

AMAN KUMAR - DOSSIER 2026.09

AtlasLM

EVIDENCE-GROUNDED RAG WORKBENCH

Hybrid dense and sparse retrieval, RRF, reranking, MMR, citations, abstention, evaluations, and per-stage tracing.

LIVE SOURCE

KarixMC / MinePulse

VPS COMMERCE PLUS GAME-SERVER BOUNDARY

Next.js, Paper 1.21.4, signed plugin APIs, replay protection, verified playtime rewards, balances, command delivery, retries, and refunds.

LIVE SOURCE

GPT Prototype

125M PARAMETER TRANSFORMER FROM FIRST PRINCIPLES

RoPE, SwiGLU, RMSNorm, QK-Norm, Muon, AdamW, memory-mapped data, and dual-mode local/GPU training workflows.

SOURCE

Autonomous Personal Agent

AUTONOMY INSIDE A SAFETY ENVELOPE

Policy gates, approval checkpoints, budgets, memory, observability, secure tool execution, and explicit trust boundaries.

SOURCE

Revive

EXPLAINABLE PAYMENT-RECOVERY ORCHESTRATION

Deterministic trust policies, rail-aware actions, audit evidence, and a live interface for inspecting decisions rather than accepting opaque automation.

LIVE SOURCE

EXPERIENCE

JUL 2026 - PRESENT

Project Lead Developer Intern

SIP Organization

AI-powered WhatsApp onboarding and support products; distributed services; end-to-end delivery.

AUG 2025 - JUL 2026

AI Engineer Intern

micro1

Self-adaptive worker spawning, cell architecture, task allocation, and resource monitoring.

2025 - PRESENT

Independent AI / ML Developer

Remote

LLM, backend, automation, evaluation, and deployment-ready product work.

ENGINEERING SURFACE

AI / ML

PyTorch, Transformers, RAG, Qdrant, FAISS, BM25, evaluation

BACKEND

Python, TypeScript, FastAPI, Next.js, Java, REST, OAuth

DATA

PostgreSQL, Prisma, Alembic, SQLite, vector search

PLATFORM

Docker, GitHub Actions, Linux, Vercel, VPS, GCP

AUTOMATION

n8n, Dify, YouTube Data API, agents, secure tools

EDUCATION + CREDENTIAL

B.Sc. Computer Science

Scaler School of Technology with BITS Pilani | 2024 - 2028

micro1 Certified AI / ML Developer

VERIFY CREDENTIAL
