PROFILE

AI engineer focused on production LLM systems, self-adaptive agent architectures, and evidence-grounded RAG. Hands-on experience building distributed AI microservices, training transformer models from scratch, and shipping secure full-stack products to Vercel and VPS environments.

EXPERIENCE

Project Lead Developer Intern

Jul 2026 - Present

SIP Organization | Remote

- Leading AI-powered WhatsApp customer engagement products, including an intelligent onboarding bot and customer assistant, with context-aware conversational workflows and response orchestration.
- Building backend integrations and scalable AI services across distributed microservices to automate onboarding and customer-support interactions.
- Improving production reliability, performance, and user experience while coordinating end-to-end delivery of LLM-powered capabilities.

AI Engineer Intern

Aug 2025 - Jul 2026

micro1 | Remote

- Contributed to a biologically inspired, self-adaptive AI architecture by implementing automatic worker spawning for dynamic task allocation.
- Designed modular cell-based components for intelligent worker creation, inter-cell communication, workload distribution, and scalable execution.
- Added dynamic resource management and performance monitoring so the system could adapt to changing computational demand.

Independent AI / Machine Learning Developer

2025 - Present

Freelance | Remote

- Delivered LLM, machine-learning, and automation workflows using PyTorch, FastAPI, Dify, n8n, and REST integrations.
- Built modular model-training, evaluation, inference, and data-processing pipelines with version-controlled, deployment-ready code.

PROJECTS

AtlasLM - NotebookLM RAG Workbench

2026

Next.js, TypeScript, Qdrant, Upstash | [Live](#) | [GitHub](#)

- Engineered an evidence-first RAG workbench for PDF, TXT, and Markdown ingestion using deterministic chunking, metadata reconstruction, and exact deduplication.
- Implemented hybrid dense ANN and BM25 retrieval with RRF, reranking, and MMR; generated source-grounded answers with confidence scoring, abstention, and citation audits.
- Deployed on Vercel with semantic caching, live evaluations, per-stage tracing, Qdrant TurboQuant, and serverless Upstash Vector.

MinePulse / KarixMC - Minecraft Server Marketplace

2026

Next.js, TypeScript, Java, Paper API, Prisma | [Live VPS](#) | [GitHub](#)

- Shipped a full-stack Minecraft marketplace on a VPS, integrating Next.js with a Paper 1.21.4 plugin for short-lived account linking, verified playtime rewards, server stores, and command delivery.
- Built dual wallet and campaign-credit economies with configurable reward rates, server publishing, premium placement, and admin trust-and-safety controls.
- Hardened plugin APIs with HMAC-SHA256 signing, replay protection, anti-AFK telemetry, privacy-preserving IP hashing, and retryable purchase delivery with automated refunds.

Custom LLM Training and Architecture Optimization

2025

Python, PyTorch, Transformers | [GitHub](#)

- Trained a 125M-parameter GPT-style model from scratch with RoPE, SwiGLU, RMSNorm, QK-Norm, untied embeddings, and logit softcapping.
- Optimized convergence and training stability with Muon (Newton-Schulz) for matrix parameters and AdamW for embeddings.
- Engineered a memory-mapped data pipeline and dual-mode workflow for fast local debugging and large-scale GPU training.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, SQL, Go, HTML/CSS

AI / ML: LLMs, RAG, conversational AI, Transformers, PyTorch, LangChain, embeddings, NLP, prompt engineering, model evaluation

Retrieval / Data: Qdrant, Upstash Vector, FAISS, BM25, RRF, MMR, PostgreSQL, SQLite, Prisma, Pandas, NumPy

Backend / Systems: FastAPI, Next.js, REST APIs, distributed microservices, JWT, webhooks, Paper/Spigot APIs, HMAC-SHA256

DevOps / Automation: Docker, Git, GitHub Actions, CI/CD, Linux, Vercel, VPS deployment, Google Cloud Platform, n8n, Dify

EDUCATION

Scaler School of Technology (in collaboration with BITS Pilani)

Aug 2024 - Sep 2028

Bachelor of Science in Computer Science | Bengaluru, Karnataka
