

AMAN KUMAR

AI ENGINEER & FULL-STACK DEVELOPER

Bengaluru, India | +91 76671 16926 | amankumr3254u@gmail.com
aman-kumar-ai-portfolio.vercel.app | github.com/ReaperXD67 | linkedin.com/in/aman-kumar-494601329

PROFILE

AI Engineer and Full-Stack Developer building production-oriented LLM applications, agentic workflows, and evidence-grounded RAG systems. Experienced across Python, TypeScript, FastAPI, Next.js, PostgreSQL, Redis, vector databases, Docker, CI/CD, evaluation, observability, security controls, and cloud/VPS deployment.

EXPERIENCE

Project Lead Developer Intern

Jul 2026 - Present

SIP Organization | Remote

- Lead AI-powered WhatsApp onboarding and customer-assistance products with context-aware conversational workflows and response orchestration.
- Build backend integrations and scalable AI services across distributed microservices while coordinating reliability, performance, and end-to-end delivery.

AI Engineer Intern

Aug 2025 - Jul 2026

micro1 | Remote

- Implemented automatic worker spawning and dynamic task allocation for a biologically inspired, self-adaptive AI architecture.
- Designed modular cell components for worker creation, inter-cell communication, workload distribution, resource management, and performance monitoring.

Independent AI / Machine Learning Developer

2025 - Present

Freelance | Remote

- Deliver LLM, machine-learning, and automation workflows with PyTorch, FastAPI, Dify, n8n, and REST APIs; build reproducible training, evaluation, inference, and data-processing pipelines.

PROJECTS

Autonomous Personal Agent - Security-First Agent Control Plane

2026

Python, FastAPI, PostgreSQL, pgvector, Redis, Docker | [Source](#)

- Engineered a self-hosted control plane for durable agent work with transactional task and outbox state, worker leases, heartbeats, cancellation, delayed retries, and dead-letter handling.
- Implemented human-in-the-loop approvals, policy-bound actions, audit trails, model-routing boundaries, and a least-privilege MCP allowlist for safer agent execution.
- Containerized FastAPI services with PostgreSQL/pgvector and Redis; enforced 62-test CI, Ruff, dependency and secret scans, and SBOM generation.

AtlasLM - Evidence-Grounded RAG Workbench

2026

Next.js, TypeScript, Qdrant, Upstash Vector, OpenRouter | [Live](#) | [Source](#)

- Built a live document-intelligence system with deterministic ingestion, contextual chunking, exact deduplication, source metadata, and document-scoped semantic caching.
- Implemented hybrid dense ANN and BM25 retrieval with RRF, reranking, MMR, confidence scoring, abstention, citation auditing, and per-stage traces.
- Deployed on Vercel with Qdrant TurboQuant and Upstash Vector; CI runs type checks, 11 tests, retrieval evaluations, and a production build.

MinePulse / KarixMC - Production Marketplace and Paper Plugin

2026

Next.js, TypeScript, Java, PostgreSQL, Redis, Prisma, Nginx | [Live](#) | [Source](#)

- Built and deployed a VPS-hosted marketplace connecting a Next.js application to a Paper 1.21.4 plugin for account linking, verified playtime rewards, server stores, and command delivery.
- Designed wallet and campaign-credit ledgers, configurable reward rates, creator/admin workflows, and transactional purchase delivery with refund handling.
- Secured the plugin boundary with HMAC-SHA256, timestamp and nonce replay rejection, rate limits, anti-AFK challenges, encrypted secrets, backups, and rollback runbooks.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, C++, Go

AI / ML: LLM applications, agentic systems, RAG, Transformers, PyTorch, prompt/context engineering, embeddings, vector search, evaluation, observability

Backend / Data: FastAPI, Next.js, React, REST APIs, PostgreSQL, pgvector, Redis, Qdrant, Upstash Vector, Prisma, Alembic, OAuth, webhooks

Platform: Docker, Linux, Git, GitHub Actions, CI/CD, Vercel, VPS, GCP, Nginx, n8n, Dify

EDUCATION & CREDENTIAL

B.Sc. Computer Science

Aug 2024 - Sep 2028

Scaler School of Technology with BITS Pilani | Bengaluru, India

Certified Freelance AI / Machine Learning Developer - micro1, Mar 2026 | [Certificate](#)
